PROFESSIONAL SUMMARY

Data Analyst with hands-on project experience analyzing 1,470+ employee records and \$5.45M+ in revenue data. Skilled in SQL, Excel, and Power BI, building interactive dashboards that automated manual reporting workflows — cutting hours of processing time down to minutes — and enabled faster, data-driven decisions. Experienced in building KPI frameworks, identifying revenue leakage, and translating raw data into clear business recommendations. Seeking Data Analyst, Business Intelligence, or Reporting roles where analytical skills drive measurable business impact.

TECHNICAL SKILLS

- Python:** Pandas, NumPy, Matplotlib/Seaborn, Machine Learning concepts, Decision Support Systems (DSS)
- SQL:** SELECT, JOINS, GROUP BY, WHERE, Aggregations, Subqueries, Window Functions
- Excel:** Advanced Formulas, Pivot Tables, Power Query, VLOOKUP/XLOOKUP, Data Cleaning
- Power BI:** Data Modeling, DAX Measures, KPIs, Interactive Dashboards, Data Visualization
- Analytics:** EDA, Variance Analysis, Profitability Analysis, Customer Segmentation, Trend Analysis
- Core Concepts:** Data-Driven Decision Making, Business Problem Solving, Performance Measurement

PROJECTS

Sales Performance Analysis Dashboard

SQL, Excel, Power BI

- Analyzed a dataset generating \$5.45M total revenue and \$2.30M total profit.
- Measured 8.47% month-over-month profit growth, enabling proactive budget planning.
- Built a KPI dashboard tracking Revenue, Cost, Profit, and Variance across 12 months.
- Identified top-performing products generating \$95K+ profit and flagged return rates up to 9% to detect revenue leakage.
- Performed customer segmentation and monthly profitability trend analysis to guide strategic decisions.

HR Attrition Analysis

Excel, Power BI

- Analyzed 1,470 employee records to identify key attrition drivers and risk factors.
- Discovered that 68% of leavers earned below \$5K, enabling salary-targeted retention strategies.
- Developed an interactive dashboard designed to help HR teams monitor and reduce attrition risk.

Travel Campaign & AI Automation

Power BI, Excel, AI Tools

- Analyzed 3 months of travel campaign data to identify peak seasons and high-converting customer segments.
- Found that Bachelor's-degree holders were the highest-converting segment, enabling targeted ad spend.
- Automated data cleaning and reporting workflows using AI tools, cutting hours of manual work down to minutes.
- Identified April as the peak demand month, enabling optimized budget allocation.

Maven Fuzzy Factory — E-Commerce Analysis

SQL, Excel

- Tracked UTM sources to distinguish high-volume vs. high-quality marketing traffic channels.
- Measured and optimized Conversion Rate (CVR) across landing pages and checkout steps (6.83% CVR across 473K sessions).
- Identified trends in Average Order Value (AOV) and revenue growth to support strategic decision-making.

EXPERIENCE

Central Training Committee Member — YLY, Ministry of Youth & Sports

Aug 2024 – May 2026

- Assisted in organizing and coordinating structured training programs for youth participants.
- Strengthened stakeholder communication and leadership skills in cross-functional team settings.

EDUCATION

Bachelor of Management Information Systems (MIS)

2022 – 2026

Higher Institute for Computers & MIS — Tanta

- Relevant coursework: Database Management, Business Analytics, Information Systems, Decision Support Systems.

CERTIFICATIONS

- Analyzing Data with Power BI (PL-300) — Microsoft / CLS Learning Solutions, Dec 2025
- Analyzing Data with Excel (Course 20779) — Microsoft / CLS Learning Solutions, Dec 2025
- Microsoft Power BI Data Analyst — CLS Learning Solutions, Dec 2025
- Data Analysis Training Program — MCIT (Ministry of Communications & IT, Egypt), Sep 2025
